Introduction

As per agreement between the International Maize and Wheat Improvement Centre (CIMMYT) and Agricultural Advisory Society (AAS), CIMMYT has engaged AAS to scale-up and disseminate the video “Grow More, Save More, Earn more and associated CSISA-BD released videos on rice seed health to increase farmer and tillage service provider awareness of appropriate-scale machinery, conservation agriculture, Rabi season crop intensification, and good agricultural practices in the 11 target districts of the four CSISA-BD innovation hubs of Jessore, Khulna, Barisal and Faridpur within FtF zone in the south of Bangladesh. During implementation of the video show research project, the emphasis has given on the scaling-up the video “Grow More, Save More and Earn More” in 11 southern districts under Jessore, Khulna, Faridpur and Barisal CSISA-BD hubs. As per agreement between AAS and CIMMYT,, brief description on the progress of the assigned activities is presented in this final technical report covering the completed project cycle during 1 September to 31 December 2012 in 11 districts under 4 CSISA hubs (Faridpur hub: Faridpur, Gopalganj & Rajbari districts; Jessore hub: Chuadanga, Meherpur & Jessore districts; Khulna hub: Khulna & Satkhira districts; and Barisal hub: Barisal, Patuakhali & Bhola districts).

Project logistics

AAS has deployed six field staff (1 Area Coordinator, 3 Field Coordinators and 2 IT Operators) under pay roll to implement the decided activities of the approved project in 11 southern districts under 4 CSISA hubs. Harun-Ar-Rashid, Executive Director, AAS has worked as the Project Coordinator outside the pay roll and in kind services.

AAS staff hired two small trucks following the procurement procedures with minimum rental rate. AAS financial staff managed the approved fund for implementation of the project activists. AAS has arranged other relevant logistic supports required for implementation of approved project activities in 11 districts within 4 CSISA-BD hubs.

Project staff training

Regional Wheat Research Centre (RWRC) conducted two days training for AAS staff on appropriate-scale machinery, conversation agriculture and rabi season crop intensification along with practical training on seeder operation and maintenance at RWRC, Shyampur, Rajshahi during 8-9 September 2012 under the funding support from CIMMYT-BD. Two days training course was conducted by Dr.Israil Hossain, PSO, RWRC and his scientists, mechanics and operators. Total of 9 project staff received this training, of which 3 field coordinators, 2 IT operators, 2 operators of two wheel tractor, one area coordinator and the project coordinator. AAS conducted one day training for the project staff at AAS training room, AAS HQ, Lalmatia, Dhaka on 10 September 2012 on project implementation planning and guidelines on the implementation of project activities and their target and achievement in 11 districts under 4 CSISA hubs during September-December 2012. AAS also conducted a day long training for the project staff on clarification and understanding of the survey structured questionnaire through participatory training followed by practically fill-up the survey questionnaire with farmers

(respondents) at community under the overall supervision of Harun-Ar-Rashid, Project Coordinator (PC) of the video show project of CIMMYT.

Procurement of video equipment

As per guidelines from CIMMYT, AAS collected and submitted the required information and quotations for the enlisted 2 sets of relevant equipment for video show at the beginning of 4 months project cycle. The procured two sets of relevant equipment was handed over to AAS on 27 September 2012 from CIMMYT-BD office and AAS return those equipment in good working condition to CIMMYT-BD on 31 December 2012.

Administering Video Show

At the beginning of the project cycle, project staff identified the potential relevant communities for video show in collaboration with the selected service providers and afterward such communities were selected in collaboration with the selected service providers and CSISA project staff under the overall supervision of CIMMYT coordinators of 4 CSISA hubs. During the community selection, the project staff identified the lead and innovative farmers/persons at each community.

Later on the project staff finalized the event schedule in collaboration with community elites (lead and innovative farmers, owners of tea stall, agri. inputs shops and others, CBO leaders, UISC Director Etc`), involved service providers and under the supervision of CSISA project staff. Event site, time and date finalized in consultation with lead and innovative farmers/persons at each selected communities. During community selection and event schedule finalization, the project staff identified the local Tillage Service Providers (owners of 2 WT) at each working community. Community elites played vital role in invitation and participation of the targeted audiences at the video show events.

The project implemented the video show activities at 151 unions in 44 upazilas of 11 districts under 4 CSISA hubs in southern regions of Bangladesh (Table.1).

Project prepared two Banners (one for each video show team) for fixing one at each video show event under the guidelines of Dr. Timothy Krupnik, Cropping System Agronomist (CSA), CIMMYT-BD. Later, project staff prepared iron made two stands for conveniently fixing the Banner at each event site of video shows in 11 districts.

The project staff in collaboration with local elite and selected service providers implemented CIMMYT video shows using multimedia facility on large screen as per pre-decided event schedule at the decided venue in 11 project districts within 4 CSISA hubs. The project staff administered the following activities during and ends of the video show at each video show event:

- (i) Documentation of total audiences (excluding children) through head counting by community representatives and project staff
- (ii) Project staff distributed DVD(s) based on the recommendation of the audiences and with the help of community coordinators among the representative participant(s) who has DVD players at each community after video show;

- (iii) Participants were selected their community coordinator(s) and the project staff facilitated the selection process after video show at each video show event;
- (iv) Project staff distributed 5 type of leaflets with the help of community coordinators among the representative participants at each community after video show;
- (v) Project staff finalized the list of the tillage service providers (owners of 2 wheel tractor) at each community in collaboration with community coordinators;
- (vi) Project staff collected the comments and suggestions on video show and prospect of seeder use in crop seeds sowing/planting, giving emphasis on wheat along with the demand for the seeder from the audiences during plenary session;
- (vii) ITO displayed the BTV telecast schedule of BTV's Mati-O-Monus on large screen and project staff handed over the hard copy of the telecast schedule to the community coordinators.
- (viii) Project staff conducted survey using the structured questionnaire after video show with 3 farmers who watched video show at each community.

Video show through BTV

As per guidelines from Dr. Timothy Krupnik, CSA, CIMMYT-BD, AAS has finalized telecast schedule of CIMMYT video "Grow More, Save More, Earn More" with Mati-O-Manush program of BTV for telecasting one full video and 3 short videos from 30 September to 30 December 2012 in its morning schedule. As per pre agreed schedule, Mati-O-Manush program of BTV telecasted the CIMMYT full video for four times during 30 September 2012 to 2 December 2012 and the CIMMYT three types of short videos (Policy, Bed Planting and Strip tillage) telecasted 12 times during 5 October 2012 to 30 December 2012. Thus, each short video telecasted for four times during 5 October 2012 to 30 December 2012. Both full and short videos telecast schedule for 16 events in Mati-O-Manush program of BTV is provided in Table.2.

Table.2 : Total 16 telecast Schedule in BTV on Grow More, Save More, Earn More Video of CIMMYT-BD (Full and Short documentary).

Date	Time	Day	Video Item	Duration
30/09/2012	10:30am	Sunday	Full: Grow More, Save More, Earn More	22 Minutes
05/10/2012	07:30am	Friday	Policy	7 Minutes
07/10/2012	10:30am	Sunday	Bed Planting	2 Minutes
12/10/2012	07:30am	Friday	Strip Tillage	2 Minutes

02/12/2012	10:30am	Sunday	Full: Grow More, Save More, Earn More	22 Minutes
30/12/2012	07:30am	Sunday	Strip Tillage	2 Minutes

Service Providers

More than 10 types of service providers were proposed in the agreed research proposal on Scaling up the video of Grow More, Save More, Earn More and additional CSISA-BD videos in Bangladesh. Such list of service providers were reviewed at the staff meeting and decided a set of guidelines for the selection of service providers and used them during implementation of video show events in 11 project districts under 4 CSISA hubs. At early stage of the project cycle (September 2012) the relevant potential service providers were selected and enlisted before finalization of the video show events. Later the selection of service providers and finalization of video show events schedule were done simultaneously.

Total of 19 types of service providers were involved with the activities of CIMMYT video show project in 11 districts within four CSISA hubs during four months of project cycle. Out of 940 total number of frequencies for 19 types service providers, the highest number frequencies recorded for CBO (424) followed by Tea stall (155), UISC (Union Information Service Center) of Union Parishad (126), NGO (81), Agri-inputs dealers (58), Launch service (25), Bus service (21) and rest service providers' frequency recorded less than 20. The highest number of frequencies of the involved service providers recorded for Barisal hub (339) followed in order by Faridpur hub (248), Jessore hub (208) and least for Khulna hub (145). The service provider-wise number of frequency for four CSISA hubs is presented in Table.3.

Table.3: Number of frequency for 19 types of involved service providers in four CSISA hubs

Sl. No.	Service Providers	CSISA hub (Nr.)				
		Faridpur	Jessore	Khulna	Barisal	Total
1	CBO	93	106	27	198	424

18	Tillage Service Provider	0	0	2	0	2
19	Launch Service	0	0	0	25	25
Grand Total		248	208	145	339	940

Out of total 940 frequencies, the highest number of frequencies recorded for Barisal district (169) followed by Faridpur district (135), Chuadanga district (110), Bhola (92) and the frequencies for the rest seven districts recorded less than 80 frequencies in 4 CSISA hubs. District-wise total number of frequencies of 19 service providers for four CSISA hubs is presented in Table.4.

Table.4: Number of frequency for involved 19 service providers in 11 districts of 4 CSISA hubs

Hub	District	Service Providers (Nr.)
Faridpur	Faridpur	135
	Gopalganj	58
	Rajbari	55

	Bhola	92
Total: Barisal Hub		339
Grand Total		940

Number of frequencies for involved 19 types of service providers in 11 districts under 4 CSISA hubs is provided in Annex.I.A. Upazila wise number of frequency of total 940 frequencies for 19 service providers in 11 districts under 4 CSISA hubs is provided in Annex.I.B as Excel. Details list of 940 service providers in 11 districts of 4 CSISA hubs is provided in Annex.I.C as Excel.

Video show events

Total of 332 video show events conducted by two video show teams at 332 communities in 151 unions in 44 upazilas of 11 districts within four CSISA hubs during 30 September 2012 to 18 December 2012. The highest number of video show events conducted in Barisal hub (150) followed in order by Faridpur hub (94), Jessore hub (58) and Khulna hub (30). Among the 11 project districts, the highest number of video show events conducted in 15 upazilas of Barisal district (68) and lowest in 2 upazilas of Meherpur district and 4 upazilas of Jessore district (12). Total number of video show events in 11 districts and four CSISA hubs are presented in Table.5.

Number of video show events in 44 upazilas of 11 districts under 4 CSISA hubs is presented in Annex.II.A. Total reported 332 video show events at 332 communities of 151 unions in 44 upazilas of 11 districts within 4 CSISA hubs are presented in Annex.II.B as Excel.

Table.5: Number of video show events in 11 districts under 4 CSISA hubs

Audiences at video show

Total 86194 audiences watched video shows at 332 events at 332 communities in 151 unions in 44 upazilas of 11 districts under 4 CSISA hubs, of which 78% male (67101 audiences) and 22% female (19093 audiences). Average estimated about 260 audiences' watched video show per event. The highest number of audiences watched video shows in Barisal hub (37745 audiences) followed in order by Faridpur hub (26569 audiences), Jessore hub (13195 audiences) and Khulna hub (8685 audiences). Among the 11 working districts, the highest number of audiences watched video shows in Barisal district (14370 audiences) and lowest number of audiences watched video shows in Meherpur district (2780 audiences). The highest number of female audiences watched video shows in Patuakhali district (3095 audiences) and the lowest number of female audiences watched video shows in Meherpur district (410 audiences). In case of male audiences, the highest number of male audiences watched video show in Barisal district (11393 audiences) and the lowest number of male audiences watched video show in Jessore district (1990 audiences). Hub and district wise recorded number of male, female and total audiences in 11 districts under 4 CSISA hubs is presented in Table.6.

Number of audiences (male, female and total) of 332 video show events in 44 upazilas of 11 districts under 4 CSISA hubs is presented in Annex.III.A. Number of audiences of 332 video show events at 151 unions in 44 upazilas of 11 districts under 4 CSISA hubs is provided in Annex.III.B. Total reported 86194 audiences at 332 video show events at 332 communities of 151 unions in 44 upazilas of 11 districts within 4 CSISA hubs are presented in Annex.II.B as Excel.

Table.6: Number of audiences of 332 video show events in 11 districts under 4 CSISA hubs

Tillage service providers

The owners and operators of 2 wheel tractor (Power tiller) are the major tillage service providers in rural Bangladesh and they play vital role in land preparation for various crop productions under dry and wet land conditions. Such tillage service providers can play important role in dissemination of mechanical planting technology for various relevant crops. Accordingly, the project has undertaken an initiative to enlist the local tillage service providers at 332 involved communities in 44 upazilas of 11 districts under 4 CSISA hubs. Assigned field coordinators of the project enlisted 1001 owners of 2 wheel tractor (2 WT) as tillage service providers (TSPs) at 332 communities in 44 upazilas of 11 districts under 4 CSISA hubs, of which about 75% enlisted with the help of community coordinators and other elites at the communities. Such enlisted tillage service providers can be used for expansion of mechanical planting technology on commercial term and incentive basis in near future in southern regions of the country.

Out of total enlisted 1001 owners of 2WT, the highest number of owners enlisted under Faridpur hub (357) followed by Barisal hub (317), Jessore hub (249) and least for Khulna hub (78). Among 11 districts, the highest number of owners enlisted for 2WTs in Chuadanga district (198) and lowest in Meherpur district (19). Total enlisted 1001 owners of 2WTs; about 41% is Dong Feng model (410) and 59% is Sai Feng model (591). The highest number of Dong Feng 2 WT's enlisted in Faridpur district (153) and lowest number enlisted in Jessore, Chuadanga and

Satkhira districts (4). On the other hand, the highest number of Sai Feng 2WTs enlisted in Chuadanga district (194) and the lowest number enlisted in Meherpur district (7).

Hub and district wise enlisted number of owners of two types 2 WT (power tiller) in 11 districts under 4 CSISA hubs is presented in Table.7. Number of enlisted 1001 owners of 2 WT (power tiller) in 44 upazilas of 11 districts under 4 CSISA hubs is presented in Annex.IV.A. List of tillage service providers (owners of 2WT) in 44 upazilas of 11 districts under 4 CSISA hubs is provided in Annex.IV.B as Excel.

CIMMYT DVD distribution

Total of 1149 DVDs on Grow More, Save More and Earn More and additional-CSISA-BD videos distributed in 44 upazilas of 11 districts under 4 CSISA hubs during 1 September-31 December 2012 among the targeted service providers including public and private organizations. Out of distributed total 1149 DVDs, the highest number of DVDs distributed in Barisal hub (531 DVDs) followed by Faridpur hub (267 DVDs), Khulna hub (211 DVDs) and Jessore hub (140 DVDs). Among the 11 project district, the highest number of DVDs distributed in Barisal district (276 DVDs) and lowest number in Meherpur district (21 DVDs). Hub and district-wise total of 1149 DVDs distribution in 11 districts under 4 hubs is presented in Table.8.

Out of involved 19 service providers, five service providers did not received CIMMYT DVDs in 4 CSISA hubs. The highest number of DVDs received by CBOs (343 DVDs) followed by Tea stalls (319 DVDs), NGOs (167 DVDs), Bus service (141 DVDs) UISCs-UP (60 DVDs), Launch service (48 DVDs). Agri. inputs dealers (38 DVDs), AICC-AIS (13 DVDs) and rest six types of service providers received minimum number of DVDs (1-6 DVDs/service provider) in 4 CSISA hubs. The service provider-wise DVDs distribution in 4 CSISA hubs is presented in Table.9. Number of CIMMYT DVDs distribution among 19 types of services providers in 11 districts under 4 CSISA hubs is provided in Annex.V.A. List of distribution of 1149 DVDs in 11 districts under 4 CSISA hubs is provided in Annex.V. B as Excel.

Table.9: Number of DVD distribution for the involved 19 service providers in four CSISA hubs

Community Coordinators

Total of 530 community coordinators enlisted at 332 communities in 44 upazilas of 11 project districts under 4 CSISA-BD hubs. Out of 530 enlisted community coordinators, the highest number of community coordinators enlisted for Barisal hub (202) followed in order by Faridpur hub (149), Jessore hub (115) and Khulna hub (63). Among, the 11 project districts, the highest number of community coordinators enlisted in Barisal district (98) and lowest number of community coordinators enlisted in Meherpur and Jessore districts (24). Average about two community coordinators per community selected at 332 communities in 11 project districts of 4 CSISA hubs. Such enlisted community coordinators will be very much useful for future extension of mechanical sowing/planting technology through introducing the appropriate seeder for various suitable crops including wheat. The number of enlisted community coordinators and estimated community coordinators per community in 11 districts under 4 CSISA hubs is presented in Table.10.

Number of enlisted community coordinators in 44 upazilas of 11 districts under 4 CSISA hubs is provided in Annex.VI.A. List of 530 community coordinators in 44 upazilas of 11 districts under 4 CSISA hubs is provided in Annex.VI.B as Excel.

Table.10: Number of enlisted community coordinators (CCs) in 11 districts of four CSISA hubs

Hub	District	Community Coordinators (Nr.)	Video show events (Nr.)	CCs / Community (Nr.)

Leaflets distribution

Five types of 28000 leaflets distributed in 11 project districts under 4 CSISA hubs (Faridpur, Jessore, Khulna and Barisal) during four months project period. Out of 28000 leaflets, 8000 leaflets for Sonali Seeder, 6000 leaflets for each of conservation agriculture method, bed planting method, Strip tillage method and 2000 leaflets for the list of producers and importers of agri-equipment including seeder. The highest number of leaflets distributed in Faridpur hub (9350 leaflets) followed by Barisal hub (7500 leaflets), Jessore hub (7000 leaflets) and Khulna hub (4150 leaflets). Among the eleven project districts, the highest number of leaflets distributed in Barisal district (3025 leaflets) and the lowest number of leaflets distributed in Chuadanga district (1650 leaflets). Distribution of 28,000 leaflets of 5 types in 11 districts under 4 CSISA hubs is presented in Table.11.

Table.11: Five type of leaflets distribution in 11 districts within four CSISA hubs

Strip tillage demonstration

Total of 27 strip tillage demonstration plots established in eight upazilas of five districts within 3 CSISA hubs. Total 10 strip tillage demo plots established in Barisal hub, 9 demo plots in Khulna hub and 8 demo plots in Faridpur hub. Highest number of strip tillage demo plots established in Dumuria upazila in Khulna district (6 plots) and only one demo plot established in Goalanda upazila in Rajbari district. Number of strip tillage demo plots in 8 upazilas of five districts under Khulna, Faridpur and Barisal hubs is provided in Table.12.

Conduct survey

A survey was conducted with 3 farmers (poor, small and large) after video show at each community through using 4 page structured questionnaire. Accordingly, the survey was conducted with 780 respondent farmers at 260 project communities in 11 districts within 4 CSISA hubs in southern regions of the country. The project staffs filled-up 780 questionnaires (4 pages) of which 291 questionnaires filled-up in Faridpur hub; 165 questionnaires filled-up in Jessore hub, 93 questionnaires filled-up in Khulna hub and 231 questionnaires filled-up in Barisal hub. Among 11 districts, the highest number of questionnaires filled-up in Faridpur and Barisal district (123 questionnaires) and the lowest number of questionnaires filled-up in Bhola

district (18 questionnaires). Number of filled-up questionnaires in 11 districts under 4 CSISA hubs is presented in Table.13.

Table.13: Number of filled-up questionnaires in 11 districts under 4 CSISA hubs

Audiences' opinion and demand for seeder

Project staff collected the comments and suggestions on video show and prospect of seeder use in crop seeds sowing/planting, giving emphasis on wheat along with the demand for the seeder from the audiences during plenary session at the end of the video show at the involved communities in 11 districts within 4 CSISA hubs. Summarized comments and suggestions on video show and prospect of seeder use along with the demand for the seeder are provided below:

1. In general farmers' learned about seeder and mechanical seed sowing for wheat and other crops.
2. Information on mechanical seeding of crop seed in video show was not very much clear among the farmers.

3. Comparatively farmers learnt more on bed planting method than strip tillage method and accordingly some interest of farmers developed on bed planting method.
4. Farmers' knowledge on strip tillage is not very clear and their interest on strip tillage is reported as very minimum.
5. Farmers' trust is reported as minimum on strip tillage due to following reasons:
 - (a) They expect high weed infestation in their crop fields and accordingly weeding cost would be high for strip tillage;
 - (b) Most cases farmers harvest rice crop closed to the soil surface for using the harvested straw as cattle feed. So it is difficult to keep rice crop residues up to 12-30 cm for introducing strip tillage method after T.Aman harvest in most of the project districts. But farmers in Kalapara upazila of Patuakhali district are interested for introducing strip tillage method for wheat sowing after T.Aman harvest and this is because, they traditional harvest T.Aman crop by keeping 30-45 cm crop residues in the crop field.
6. Farmers' suggested for introducing mechanical planting technology through practical demonstration in their field.
7. Plowing with 48 blades of 2 wheel tractor (2WT) has been getting popularity in Faridpur and Rajbari districts mainly for onion cultivation. Farmers reported that excellent land preparation can be done by 1-2 plowing(s) with 48 blades of 2 WT. Accordingly, farmers in Faridpur and Rajbari districts are found much interested to use such land preparation with 48 blades of the 2WT(power tiller) mainly for onion production and others suitable crops as well.
8. In general farmers' lack in knowledge on conservation agriculture. Farmers expressed that such information in video show (DVDs) is not fully understandable and they demanded for practical knowledge on the same.
9. Audiences have made the following suggestions on the video show:
 - (a) Evening should be the best time for video show preferably during winter season at community in the rural area;
 - (b) Hall room under dark condition could be used for video show during day; and
 - (c) Mike or microphone need to be used during open discussion at the end of the video show at the community.
10. Audiences suggested that the owners of the 2 wheel tractor (Power Tiller) could purchase the seeder for mechanical seed sowing for the suitable crops including wheat on payment basis like payment based existing land preparation services with 2 wheel tractor (2WT) in the country. Accordingly, mechanical seeding technology will be disseminated in large scale on commercial basis and incentive term for both service providers and customers (farmers) in the country.
